[Form 2-2] Application II _11page

A. General Information

1. Competition Summary

Dokdo can be seen with the naked eye from Ulleungdo on clear days. Due to this geographical characteristic, Dokdo has been recognized as part of Ulleungdo. 『Sejong Chronicles』 『geography section』 (1454) states that "Two islands including Woosan (Dokdo) and Mureung (Ulleungdo) is located at the east sea of the Hyeon. These two islands are not far away from each other so that these islands can be seen from each other on a clear day. It was called as the State of Usan in the era of the Silla Dynasty, and it was also called as Ulleungdo", indicating that Dokdo could be seen from Ulleungdo and Woosando was affiliated to the State of Usan.

Understand and consider the environment, history and social context of Dokdo, In order to preserve and develop eco-friendly, sustainable designs should be searched and the construction of zero energy smart green home suitable for harsh natural environments to human lives should be designed. This contest intends to find the concept of space for sustainable construction with ecological environment while preserving the natural and ecological environments without damage. It would be possible to identify the virtue of eco-friendly sustainable construction and present the direction of construction in future by searching for the cycle of ecological system and people's life style, behavior pattern and way of thinking. The residential construction plan combining with the zero energy smart green home and Ubiquitous technology aims for the establishment of eco-centered environments eventually. For this, the complementary relation between the construction space and technology should be maintained, and each other and it should be constructed in the way to improve the comfortableness of human and natural environments.

1) Formativeness

In order to fully understand and consider the environment, history and social context of Dokdo, it is necessary to explore the formativeness of it's space and form.

2) Sustainable Design

Sustainable designs for preserving the ecological and natural environments in Korean territory is the most important virtue for land development. Various developments along with rapid changes in the cycle of ecological system and human society should be explored with the method of co-existence for both the ecological system and human society.

3) Green Design

Green Design is an important direction which residential architecture should pursue for solving environmental problems in the world such as the depletion of energy resources, global warning due to improper use of fossil fuel and climate changes. The utilization of green energy for this is essential for the construction space in harsh natural environment such as Dokdo. Maximize the preservation of pleasant natural environment.

2. Qualification for participation

Enrolled students and students on a leave of absence of a junior college or higher
(Each student can submit only one design work)

3. Awards

Classification	Number of Selection	Prize details	
Grand prize	1	3 Million Won	Certificate of award
First prize	2	1 Million Won	Certificate of award
Second prize	Many	-	Certificate of award
Participation prize	Many	-	Certificate of award

4. Contest schedule (based on Korean Standard Time)

- 1) Contest Announcement : Jul. 1st, 2024
- 2) Reception of questions : Nov 18th, 2024 ~ PM 12 (midnight), Nov 22nd, 2024
Email : tedarch21@gmail.com
Official Site : <http://teda.kookmin.ac.kr>
Webhard Site : www.webhard.co.kr
Webhard ID : dokdo20
Webhard PW : 1111
- 3) Receipt date : Submission Email must arrive at PM 1~5 December 18th, 2024(Wed) (KST)
- 4) Announcement of examination result : PM 10, December 19th, 2024(Thu), (KST)

5. Award ceremony and exhibition

- 1) Date of award ceremony : 2:00 PM, December 20th, 2024(Fri), (KST)
- 2) Place of award ceremony : B1F, Seminar Room, Bokji-gwan of Kookmin University,
77, Jeongneung-ro, Seongbuk-gu, Seoul, Republic of Korea
- 3) Exhibition date : December 20th, 2024(Fri) ~ 2:00 PM, December 22nd, 2024(Sun),
(KST)
- 4) Exhibition place : B1F, A3 Theater, Bokji-gwan of Kookmin University,
77, Jeongneung-ro, Seongbuk-gu, Seoul, Republic of Korea

6. Inquiry

NO. 506 Smart Home Industrialization Support Center , Graduate School of Techno Design , Kookmin University, 77, Jeongneung-ro, Seongbuk-gu, Seoul, Republic of Korea 02707, Republic of KOREA TEL: +82-2-910-5155, +82-2-910-5158

Email : tedarch21@gmail.com

Official site : <http://teda.kookmin.ac.kr>

7. Submission

- Email Submission : tedarch21@gmail.com
- Q&A : TEL +82-10-6406-1342 / +82-10-4859-2913

8. Miscellaneous

1) Copyright

- ① The copyright of all winning design works will belong to the host organization.
- ② All winning design works may be published and distributed in booklet by the host organization.
- ③ If any prize winning design work is submitted to another organization or is confirmed that it has been presented already in the past, the award and the prize money will be clawed back.

2) The contest schedule and prize details are subject to change according to the circumstances of host organization.

9. Host organization

Supervision : Smart Home Industrialization Support Center designated by
Ministry of Trade, Industry and Energy

Host : Well-Formed Smart Space Design Project Team of the Ministry of
Education Techno Design Research Center of Kookmin University

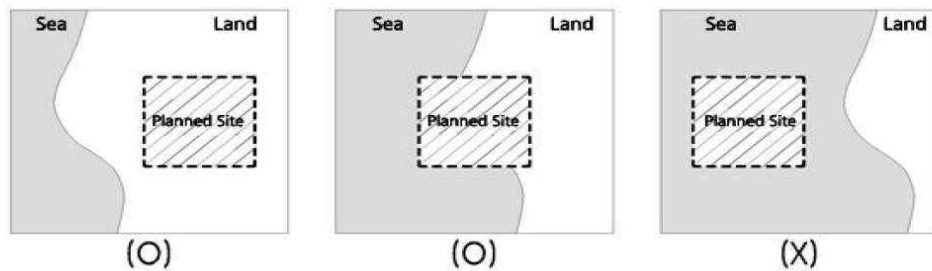

Sponsor : Korean Institute of Architects

B. Design Guidelines

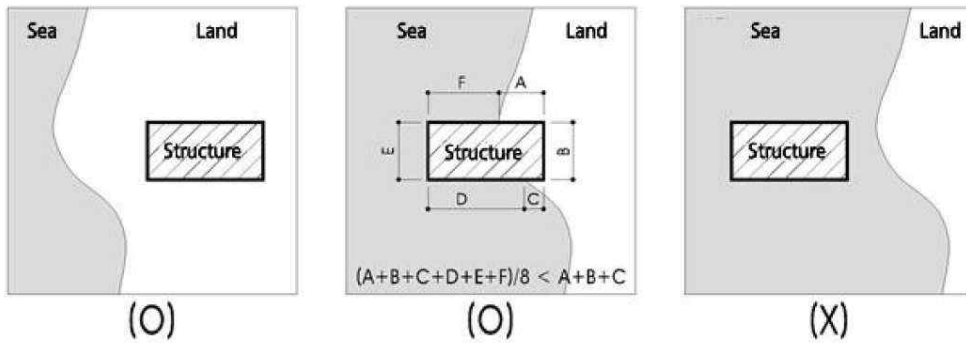

1. Site selection

- ① Select it freely within Dokdo
- ② Size : Within 400m² (including the plan for outside space)
- ③ The inland area (based on current status) of Dongdo Island or Seodo Island should be included.

※ **Example of planned site**

- ④ Regardless of Paragraph ① above, the following cases can't be selected as site.
 - Sea, annexed island, rock, reef or other similar places that are not connected with Dongdo Island or Seodo Island by land route.
 - Main habitat of animals and plants requiring protection
 - Public facility area where Dokdo guard, Mangyangdae, lighthouse or old ferry exists (excluding private facilities) DGDC 140519-6
 - Area where a landmark stone or a memorial store with historical value of conservation exists
 - Area where is far away from the existing footpath so that a new access road should be established
 - Area with concern of damaging the ecological system and landscape of Dokdo (Natural monument No. 336) significantly
- ⑤ Recommended area for planned site

Submission Guidelines

1. Upload method

Webhard Site	www.webhard.co.kr
Guest ID	dokdo20
Guest PW	1111
Folder Name	Name_Email (Example : Kevin_1234@gmail.com)

- ① After logging in to Webhard, all items to be submitted are stored in a single folder in the dedicated Webhard GUEST folder. Create a folder and upload it
- ② Be sure to set a password to prevent damage to submitted files.

2. Type of items for online submission

- ① 1 application for contest
(attach 1 Certificate of enrollment or Certificate of leave of absence)
 - ② Send the photo of exhibitor
 - ③ Design Documents (A3 420mmx297mm, cover page 1 + design pages 6)
 - ④ Design pages and application for contest in PDF format
- ※ The design panel should include the image of artwork model.**

3. Applications for contest

(Forms 2-1 and 2-2) and Certificate of enrollment (leave of absence)

4. Anonymity of submission material

① The principle of anonymity for artworks should be maintained during the period of contest until the screening committee reaches a final decision.

② The printed design panel should not include any password or symbol which indicates the applicant, and in case of violating this requirement, the applicant will be disqualified.

※ Regardless of Paragraphs ① and ② above, the design panel sent to dokdo.submission@gmail.com should include the affiliated school and your name in the designated positions. (Refer to the example of panel and the attached file

5. Submission file name guideline

※ Email Submission : tedarch21@gmail.com

File Composition		File Format	Form
01	Application	DOC [Form2-1,2-2]	* File name must be '01_applicant name_email.doc' (ex : 01_Alex_alex@gmail.com.doc)
02	Photo of Exhibitor	JPG size 3x4cm resolution 300dpi	* File name must be '02_applicant name_email.doc' (ex : 02_Alex_alex@gmail.com.doc)
03	Design Panels	PDF resolution 300dpi	Page configuration - Part A - Part B * included image resolution must be 300dpi in PDF. * File name must be '04_REPORT.pdf'.

6. Design Panels guideline

① Size : 420mm wide X 1485mm long, 1 panel (Prepare it as the longer side to be perpendicular)

② No additional protruding attachment with concern of damage

③ The contents and reduced scale should be as follows.

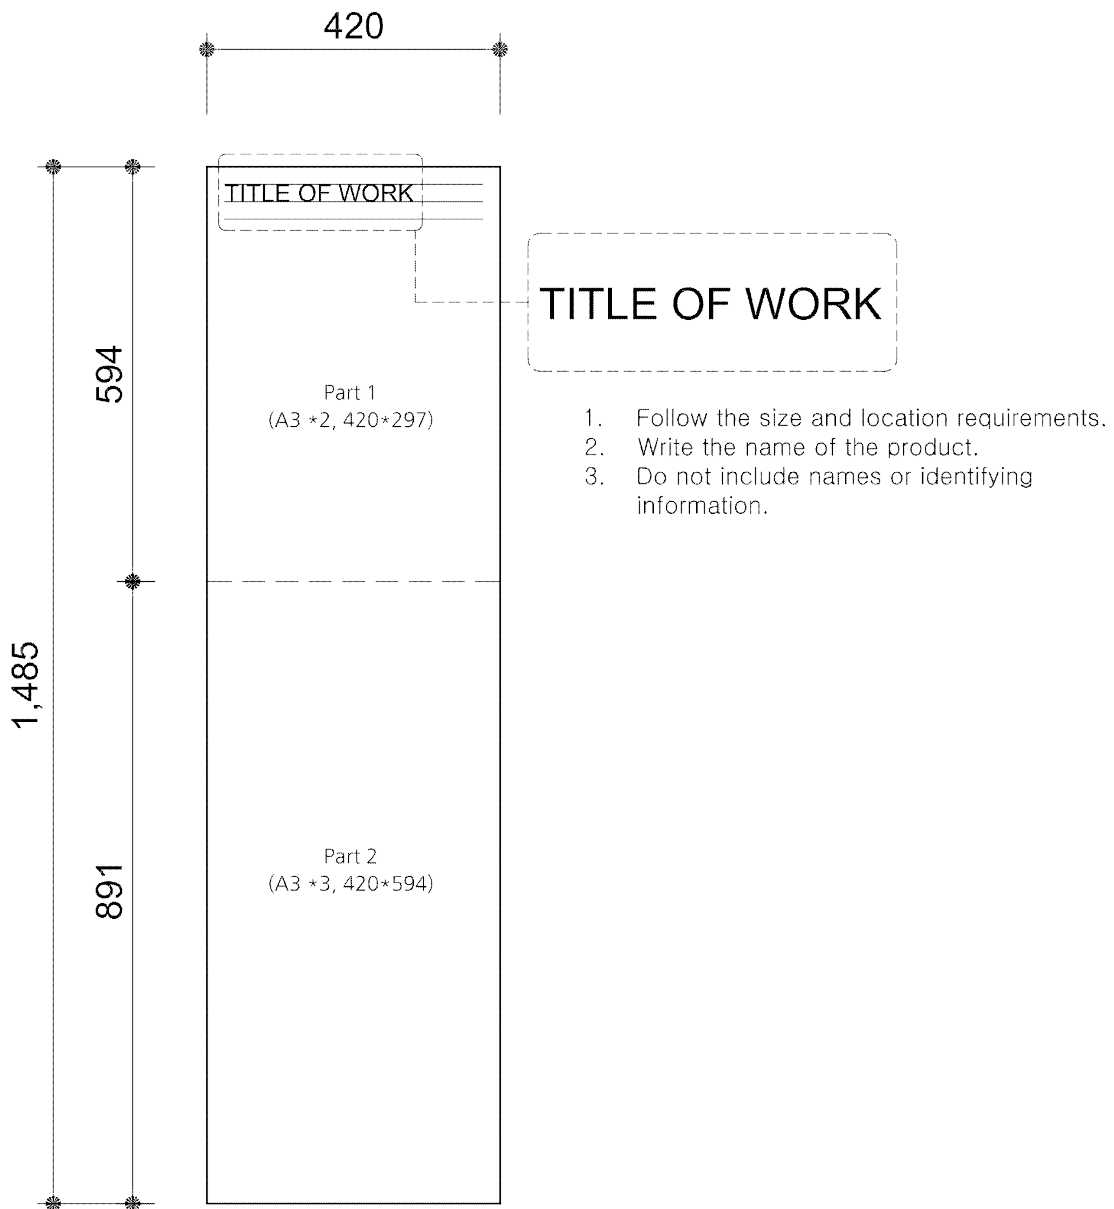

Classification		Reduced scale	Preparation method
PART A	Name of artwork	NONE	- Observe the position, size and font
	Design summary	NONE	- Includes area for each room
	Location map/Concept map	NONE	
	3D projection drawing	NONE	- Express external spaces including sea, land, plants, deck, yard and access road near the planned structure
PART B	Plot plan	1/100~1/200	- Express external spaces including sea, land, plants, deck, yard and access road near the planned structure
	Floor plan of main floor	1/80	Main floor : 1 floor with access space and main room
	Floor plan of other floors	1/80~1/100	- Other floors : All other floors except for the main floor (Reduced scale of 1/80 recommended) - Replace the floor plan of roof floor with the plot plan
	Elevation drawing	Arbitrarily	- Prepare 2 or more pages (Reduced scale of 1/80 recommended)
	Sectional drawing	Arbitrarily	- Prepare 1 or more pages
	Other	Arbitrarily	- Possible to add additional drawings for the description of artwork.

※ Common requirements for drawings and documents to be submitted

- Express external space for all drawings where the ground is expressed (Plot plan, floor plan of ground floor, elevation drawing, sectional drawing, 3D projection drawing)
- State the name of artwork, azimuth, reduced scale, name of floor plan, level and room name
- Indicate measurements (the plot plan and projection drawing are excluded)
- The design panel should be prepared in English.
- The designer can decide other presentation methods of drawing not specified in this guideline freely.

7. Example of panel

※ Example of panel

Unit of length is mm

8. Remarks

In order to ensure fairness in the evaluation, if the design details violate this guideline (design guideline, drawings and documents preparation standards and model production standards, etc) and false information is stated in the application for contest, points may be deducted or it may be disqualified according to the decision of screening committee.
